QUALIFYING PROCEDURE - CORNWALL MOTOR SPEEDWAY

Cornwall Motor Speedway utilises a qualifying procedure which would replace the former handicap system used in previous years. With this change, we hope to simplify qualifying, enable racers to succeed (fewer cars handicapped) and attract new drivers at the speedway on a weekly basis. Here are the suggested procedures to follow:

- Registration will remain the responsibility of the race team - **ALL** divisions will have a nightly draw.
- Registration will end 30 minutes prior to race time for Mini-Stock and 10 minutes for Pro-Stock, Sportsman and Modified as per Track Procedures. ALL drivers/cars must be registered to the "My Race PASS" system.
- The car **MUST** be present in the pit area to be eligible for registration & draw for position. Failure to register/draw will result in that car starting scratch in qualifying.
- The registration/draw will determine your starting position in qualifying in a heads-up format (See Appendix A). Lowest numbers drawn will fill front rows and continue back.
- Once the final heat is completed in your respective division, the last car eligible will draw an inversion number at the scales which will set the lineup for your feature event (See scenarios below).
- Inversion numbers will start at 0 to the maximum number depending on cars registered in your division on that given night (See Appendix A and Scenarios below).
- The rest of the feature lineup will be set via heads up format.
- Points will continue to be awarded to the top 5 finishers in each heat (5, 4, 3, 2, 1).
- The handicap points system will no longer apply

This qualifying system will be in effect during **ALL regular night events only** of your respective division. All track special/series events would resort to a (draw/groups/time trials...etc) procedure.
